EDUCATION

University of Kansas

Bachelor of Science in Computer Science
Minor in Sports Management
University Honor Program and Honors Roll
GPA: 4.0/4.0

Lawrence, KS

May 2026

WORK EXPERIENCE

H&R Block

Software Engineer Intern & Co-Op

Kansas City, MO

May 2025- August 2025

- Contributed to development of internal tax software application, used to serve 11 million clients, utilizing *C#*, *.NET* and *Angular*, enhancing user workflow for 70,000 tax professionals
- Built new *Angular* UI components to standardize tax flow behavior, affecting over 100,000 tax returns
- Implemented *C#* backend features to integrate UI components and logic, improving consistency and scalability

Spirit AeroSystems

IT Intern

Wichita, KS

May 2024 - August 2024

- Designed, developed, and tested a *PowerApps* form for checking out technology and tracking user's location; integrated with *Power Automate*, automating *Python* and *Powershell* scripts to pull user location data from Active Directory and storing results in *SharePoint*, reducing manual labor and efficiently storing data
- Created a live *PowerBI* dashboard to visualize defense programs' financial data, automating previously manual compilation of reports and boosting efficiency by 50%, identified and corrected financial inaccuracies of \$50,000+

University of Kansas

Supplemental Instructor

Lawrence, KS

August 2023 - May 2024

- Constructed interactive lessons for Calculus I students with varied knowledge levels, 100% of surveyed participants claimed to have an increased letter grade or helped maintain their "A" due to attending these sessions
- Engaged with 200+ students attending lectures, answered questions and clarified material discussed

PROJECT EXPERIENCE

Kanbe's Markets

Software Developer

Kansas City, MO

September 2023 - May 2024

- Developed a dynamic dashboard, using *node.js* and *HTML*, displaying live data on company's metrics, visualizing them in bar charts for management to use for financial decisions and goal tracking
- Engineered a server used as a *REST API* that fetches data from another server designed as a *MongoDB* database
- Utilized *Pandas* for *data analysis* and calculated necessary statistics needed to accurately represent company's sales

LEADERSHIP AND ACTIVITIES

University of Kansas Business School

Catalyst Program

Lawrence, KS

September 2024 - Present

- Collaborating with KU Career Center to attain contracted work for undergraduates, helping them gain experience
- Utilizing business modules, canvases, and resources to grow business models and develop the venture

Cohort Guide

- Leading cohorts aimed at supporting entrepreneurial ventures through resources and mentorship

Women in Computing

Website Representative & Project Manager

Lawrence, KS

July 2024 - May 2025

- Led team of 8 board members to ensure successful creation, development, and deployment of the club's website
- Managed all aspects of *GitHub* for the website. Tasks include branch management, overseeing pull requests, handling code merges, and resolving merge conflicts
- Developed a contact form on the website using *JavaScript* to send HTTP POST requests to *Power Automate* for automated email messages, driving communication efficiency for the organization

Women in Computing

Expo Leader

Lawrence, KS

September 2022 - February 2023

- Designed and built interactive coding games for 1000+ young students attending KU's EXPO, while actively exposing kids to technology fields
- Demonstrated *project management* by supervising and delegating tasks to 20+ volunteers
